

Plug this vending machine into  
your PaySchools system to:

save on labor costs

**speed up your lunch line**

offer students more choice

sell fresh food 24/7

**maximize revenue**

 **PaySchools**  
An i3 Verticals Company

 **Vend-ucation**

## Add the vending system that adds to your bottom line.

PaySchools is always on the lookout for smart solutions to help you with your challenges.

That's why we've partnered with Venducation to offer vending-machine integration to the PaySchools nutrition services system.

### HERE'S HOW IT WORKS:

1. You load the refrigerated machine with your a la carte menu items.
2. Students pay for vending-machine items with their PaySchools accounts.
3. The vending-machine software talks to PaySchools Admin, Central, and QuikLunch, reconciling all the data and generating the reports you need.

Students get more choices, more easily.

You get a faster lunch line, more meals served with less labor, reduced food waste, and higher revenue.

**In fact, this vending-machine system has been shown to increase total cafeteria sales by 10 to 20 percent. And 98 percent of districts see ROI within two years.**

Now that's a smart add-on.
